Water driven ventilators
MH 236 & 260

Easy Pow’Air Technology

Powerful ventilation without pollution

- **Automatic tilt**: when raised, the carrying handle automatically positions the ventilator to optimal tilt.

- **Positioning from 0,90 m to 6 m**:
  - Effective between 2 to 6 m from the opening
  - Can also be positioned as near as 0,90 m

- **Airflow**: 41 534 m³/h for MH236 and 52 046 m³/h for MH260

- **Easy to handle & stable**: Large, very wide wheels make the MH 236 and the MH260 very easy to handle even on soft ground (wheels at the back).

- **Reinforced turbine**.

- **Full protective casing**: epoxy coating.

- **9 HP Hydraulic Water driven motor**.

- **Fine tilt adjustment** between +10° and +20° (accessory provided to ventilate semi-basements). This working angle of more than +10° overcomes the problem of entrances with steps, etc.

- Integrated misting sytem
- Operating pressure: 10 bar
- Shut-off and control valve

Easy Pow’Air Technology added to the Turbo-ventilators specific air entrainment effect:

**Advantage 1:**
Effective between 2 to 6 m
Can also be positioned as near as 0,90 m

**Advantage 2:**
Easy to handle:
More space between the entrance and the ventilator.

**Advantage 3:**
Ventilate in all circumstances,
even with raised floors or steps

**Advantage 4:**
Reduced noise level for users due to a positioning further away from the entrance.

MAINTENANCE
Reduced maintenance due to its robust conception.
All the components are easily interchangeable by the user.

As it is our policy to constantly seek to improve our products, we reserve the right to change the specification of our equipment without notice.
