Water driven ventilators
MH 236 & 260

Easy Pow’Air Technology

Powerful ventilation without pollution

- **Automatic tilt**: when raised, the carrying handle automatically positions the ventilator to optimal tilt.

- **Positioning from 0,90 m to 6 m**:
  - Effective between 2 to 6 m from the opening
  - Can also be positioned as near as 0,90 m

- **Airflow**: 41 534 m³/h for MH236 and 52 046 m³/h for MH260

- **Easy to handle & stable**: Large, very wide wheels make the MH 236 and the MH260 very easy to handle even on soft ground (wheels at the back).

- **Reinforced turbine**.

- **Full protective casing**: epoxy coating.

- **9 HP Hydraulic Water driven motor**.

- **Fine tilt adjustment** between +10° and +20° (accessory provided to ventilate semi-basements). This working angle of more than +10° overcomes the problem of entrances with steps, etc.

- **Integrated misting sytem**

- **Normal operating pressure**: 10 bar

- **Shut-off and control valve**

Easy Pow’Air Technology added to the Turbo-ventilators specific air entrainment effect:

- **Advantage 1**: Effective between 2 to 6 m
  Can also be positioned as near as 0,90 m
- **Advantage 2**: Easy to handle
  More space between the entrance and the ventilator.
- **Advantage 3**: Ventilate in all circumstances, even with raised floors or steps
- **Advantage 4**: Reduced noise level for users due to a positioning further away from the entrance.

MAINTENANCE

Reduced maintenance due to its robust conception.
All the components are easily interchangeable by the user.
